

Rising Waters, Rising Voices: ***Continuing the Conversation about Marin Climate Costs***

Hear and help Marin climate leaders as they brainstorm the financial implications of sea level rise and other climate impacts, including:

- *Who pays for the damage from more flooding, wildfires, drought & heat?*
- *How will our most vulnerable communities cope?*
- *Could enhanced wetlands help absorb higher storm surges?*
- *Can we come together to fund a county-wide climate vulnerability assessment?*
- *How can households save money by reducing carbon and increasing resilience?*
- *Doesn't it make more economic sense to solve climate change than 'adapt' to it?*
- *How can EPA, regional, state and national efforts help?*

Representatives from the organizations that presented this summer's overflow 'Rising Waters, Rising Rates' event on insurance costs will pick up the discussion of what we can do to 'manage the risks' from growing climate disruptions. ***Add your voice!***

Wednesday, October 8

7:00-8:30 p.m.

**San Rafael Corporate Center
750 Lindero Street**
